Description Zacky® Car Protection

Zacky® Car Protection is an intelligent, fast to be attached and complete protection for your car with a long lifespan. It protects your car against dirt, stains, liquids and damage when transporting garden waste, wood, earth or even Christmas trees. Zacky® Car Protection fits in all combinations and SUV models and for the first time protects the entire cargo space.

How does Zacky® Car Protection work?

1. Open the tailgate and the rear side doors and fold the rear seats forward.
2. Unfold Zacky® and insert the closed end toward the front, pull the strings for the respective side doors up above the door frame and close the doors.
3. Fold the discharge protection down and secure it with the straps down below the body of your car. Then attach Zacky® with three gripping arms on the upper trunk frame.
4. When you are finished with the loading of the trunk, remove the belts and gripping arms, open the rear side doors and pull Zacky® out of your trunk.

Your car remains perfectly clean!

Technical information:

Size: 165 x 115 x 70 cm
