

Thermo-Kaffeefilter

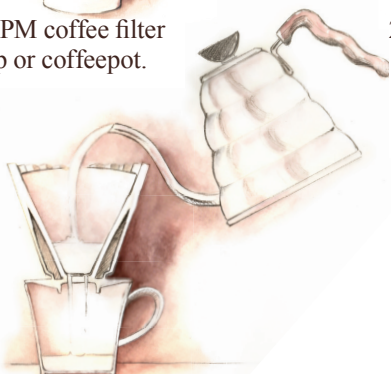

Item-no.: 223-405

1. Place a KPM coffee filter over a cup or coffeepot.

2. Fold a KPM filter paper and place inside the coffee filter.

3. Wet the KPM filter paper with hot water.

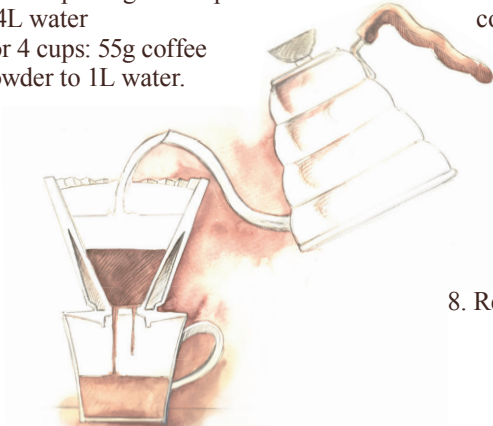

4. Wet the KPM filter paper with hot water.

5. Spoon some KPM coffee powder into the KPM filter.
For 2 cups: 25g coffee powder to 0.4L water
For 4 cups: 55g coffee powder to 1L water.

6. Heat the water to 92 – 96°C.
Using circular movements, pour over the water until it just covers the coffee powder. Leave to soak for 20-30 secs.

7. Gradually add the remaining water, circling as before.

8. Relax and enjoy your coffee break.
