

Fit over sunglasses with inter changeable Frames

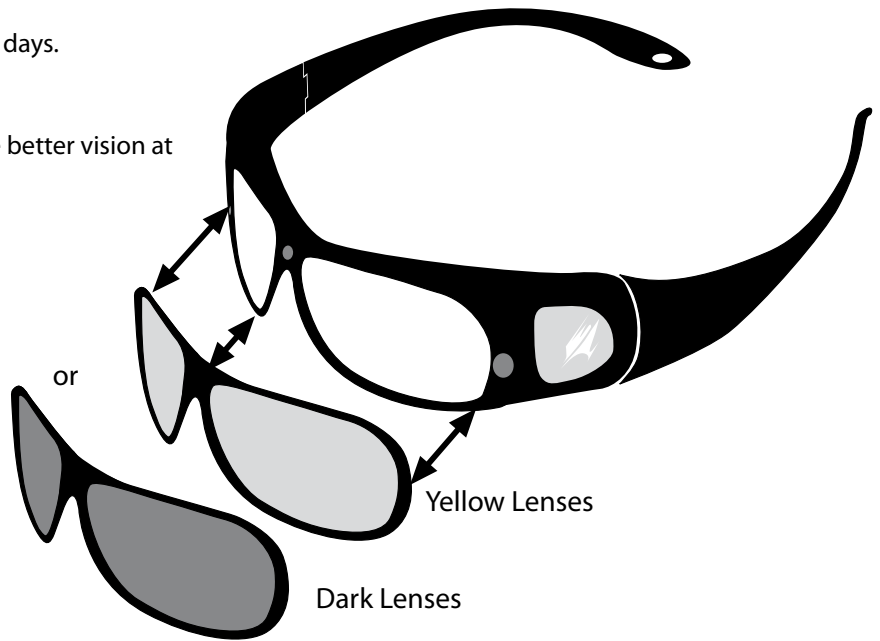

1. Frame with dark Lenses

For daylight: with polarised

EU category 3 lenses for bright sunny days.

2. Frame with yellow Lenses

For nightlight: Night vision lenses enable better vision at night and in poor visibility.

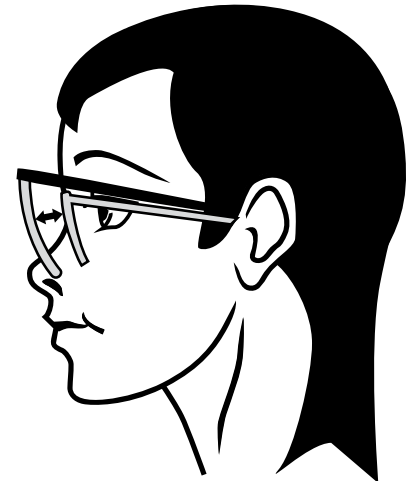

The light polycarbonate Frame fits over most prescription glasses (see picture)

The UV 400 standart Lenses filter harmful not visible UV rays in the wave range of 280 to 400 nanometre.

Please keep the glasses in the bag. Don't clean the glasses with etching cleaning agents, solvents or strong detergents. Instead clean it wit a wet cloth.

In case of damage do not wear the glasses.
Never look directly into the sun.
