

Silver Plater

Item-no.: 573-519, 573-527

Pure Silver in a liquid!

Beautifully restores, enhances and protects silver and silver plated objects.

To obtain the best results, carefully read and follow the useful tips and instructions in this leaflet.

HOLLAND HALLMARK Silver Plater™

For quick and easy silver plating or re-plating.
For professional and home use.

Silver Plater is a special polish to restore, enhance and protect most dull and worn silver and silverplate. Also copper and brass objects can now be simply transformed into beautiful silver-plated treasures.

Silver Plater cleans, restores and enhances with pure silver. Silver Plater also protects against premature tarnishing.

Silver Plater is a unique combination of non-toxic, non-abrasive ingredients and pure silver which amazingly silver-plates during cleaning. Formulated with your safety and that of the environment in mind, it is water-based, non-toxic and non-flammable. Silver Plater is made without solvents, phosphates or ammonia.

Does your Silverware need Holland Hallmark Silver Plater?

Yes it does, if your silver plate is showing copper or brass. Silver Plater will put the silver back whilst you are simply polishing. Up to 95% restoration success guaranteed. This special polish enhances the silver lustre and retards tarnishing.

Yes it does, if your silverware looks rather dull and the worst for wear. Clean with Silver Plater and add the sparkle of new silver. Silver Plater may be used on decorative objects, cutlery, dinner service items and much more.

Please note: Silver Plater is not a filler and thus will not fill in scratch-marks or remove corrosion. Silver Plater will silver-plate only on copper based metals. It will restore for example, worn silver plate on copper, brass, bronze, alpaca etc. However, it will not silver-plate plastic, glass, wood, aluminium, chrome, iron, or any other non-copper-based materials.

Notes for best result:

- First clean off any loose dirt, grease or heavy tarnish, with a suitable household cleaner or Holland Hallmark Copper/Brass Cleaner, then wash, rinse and dry.
- Completely remove any lacquer with standard lacquer remover, thinners or acetone. Wash, rinse and dry to neutralise.

METHOD OF USE:

1. Protect hands with household gloves and clothing and work area etc. with plastic, against dark brown stains.
2. Shake well, pour a little into a glass dish (or other non-metal bowl). Immediately replace the bottle cap, to avoid spillage.
3. Apply liberally, PREFERABLY with a piece of balled up cotton wool or a clean application sponge. Do NOT use an impregnated cloth. Only treat small areas at a time, 10cm².
4. Rub in firmly and thoroughly for 10/15 secs. so the silver in the liquid is allowed to bond with the base metal. Whilst polishing, keep the liquid moving in a circular motion.
5. Re-apply liquid 2 or 3 times for best results.
6. Immediately buff off with a clean, dry, soft cloth. Or wash, rinse and dry.
7. Repeat if required, until the object is restored satisfactorily.

PS: On chains, filigree and ornate items you may need a soft brush to apply. Avoid splashing and thus staining. If possible, wash, rinse and dry. Buff off with a soft clean brush and cloth.

AFTERCARE:

Initially, continue to use Silver Plater as and when polishing is required, to increase the silver you have applied. Never again use abrasive polishes. For best and most economic, long term maintenance of silver, use HOLLAND HALLMARK SILVER ENHANCER. Regular use will protect the silver which you have just applied and the silver on other silverware – **forever!**

GENERAL WARNING:

As with any household cleaner, keep out of reach of children. In case of contact with eyes or cuts, rinse well with clean, cold water. If swallowed, warn a doctor. Without protection, hands, clothing and work area will become stained. Skin stains should vanish within a few days, otherwise remove them with a soft scouring pad, household bleach and water, or sodiumthiosulphate obtained from the chemist.

HOLLAND HALLMARK SILVER ENHANCER™

A unique cleaning and preservation polish, it adds silver, gives a beautiful lustre and protects against tarnish.

Silver Enhancer easily cleans silver and silver-plated objects and enhances the shine with sparkling silver in the liquid. Silver Enhancer also protects against early tarnishing. The perfect polish for all silver and silver plate, both new and antique.

Silver Enhancer, like Silver Plater, contains a unique combination of user – and environmentally friendly ingredients.

METHOD OF USE:

1. Protect hands with household gloves and clothing and work area etc. with plastic, against dark brown stains.
2. Shake well, pour a little into a glass dish (or other non-metal bowl). Immediately replace the bottle cap, to avoid spillage.
3. Apply liberally, PREFERABLY with a piece of balled up cotton wool or a clean application sponge. Do NOT use an impregnated cloth. Only treat small areas at a time.
4. Rub in firmly and thoroughly. Whilst polishing, keep the liquid moving in a circular motion.
5. Re-apply liquid if required.
6. Immediately buff off with a clean, dry, soft cloth. Or wash, rinse and dry.

For GENERAL WARNING, TIPS for the use on ornate items and for BEST PRACTICE information, see Silver Plater.

AFTERCARE: NEVER again use abrasive polishes. For best long term results and maximum protection of silver and silver plate, use HOLLAND HALLMARK SILVER ENHANCER regularly, this will protect your silver – **forever!**
